

Fairy Shrimp Papercraft

- - - - - Mountain fold
 - . - . - Valley fold
 _____ Cut line
 Attachment site

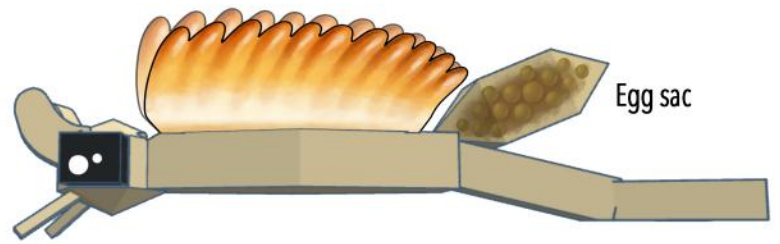

Instructions

Materials needed: Scissors and craft glue

1. Cut out all pieces along black solid lines. Look at the completed models pictured on the right to see where all the pieces will go and how they align.

2. Construct the shrimp body parts by matching the numbers and gluing the tabs. See the key on page 1 for the types of folds you will need. For the thoracopods (swimming appendages), fold in half at #1 first and glue part to the back of itself. Then fold at #2 to make a small flap that can be glued to the thorax (body). Attach body parts to one another by matching the capital letters on each part.

Fairy shrimp swim upside down!
